

**THE SCIENCEHEARTED
CENTER**

**CENTERED
ON YOU &
YOUR NEEDS**

A LAB THAT'S ALWAYS, EVER, ONLY ABOUT THE SCIENCE.

We believe in science, not guesswork. And nowhere is that more evident than at The ScienceHearted Center, our state-of-the-art lab in Waukesha, Wisconsin, USA.

From exploring product innovations to tailoring microbial solutions for unique challenges, the expert team at The ScienceHearted Center is making a difference across the food chain.

MICROBIAL ECOLOGY, GENOMICS, IMMUNOLOGY, YOU GET THE IDEA.

Every day, you and others involved in animal and food production make decisions that impact the global food supply. And that's why we feel so strongly about investing in your success.

You can count on The ScienceHearted Center for state-of-the-art tools and expertise across core competencies. Our advanced degrees coupled with years of hands-on experience help turn this investment into actionable insights.

HOME TO *BACILLUS SUBTILIS* 839, *BACILLUS SUBTILIS* 4976 & MORE THAN 29,998 BENEFICIAL STRAINS LIKE THEM.

The scientists at The ScienceHearted Center can access more than 30,000 *Bacillus* strains. This allows them to choose the "best of the best" for each environment, closing the gap on what's happening at the production level. The result: Targeted Microbial Solutions™.

Working closely with our technical services teams to maintain a pulse on production-level challenges, our scientists develop customized solutions, integrating strains as needed as populations or challenges shift.

INTEGRATING SCIENCE & SERVICE. ALWAYS.

At ARM & HAMMER™, we're committed to integrating science and service to align with your business and its objectives.

Whether it's providing expert assistance on specific disease challenges or addressing the unique needs of your production environment, we never take a one-size-fits-all approach. Instead, our integrated approach makes full use of resources like The ScienceHearted Center to identify and implement what's best for your situation.

THE POWER OF &

Ever think about &? It's more than just a curiously shaped symbol.

It represents an unwavering belief in the power of addition, that there's always one more **#ScienceHearted** opportunity to be unlocked within animal and food production. Then another. Followed by several more after that.

At The ScienceHearted Center, we can't wait to find them, perfect them, share them with our customers.

We are nutritional innovators, microbial pioneers & breakthruologists.

We bring *what if & why not* together.

We believe in the power of adding solutions & uncovering opportunities.

We are ready, willing & eager to tap this power every day.

#ScienceHearted
