

**TAPPING THE
POWER
OF**

SO MANY CHALLENGES AT SO MANY LEVELS.

From economic pressures and consumer expectations to new regulatory requirements and the ongoing need for disease and pathogen control, every day is filled with more challenges you can see coming—and others you can't.

Unfortunately, most food chain solution providers only have answers to one need or another, rarely seeing all the challenges you face from every angle you do.

WHAT IF YOU COULD WORK WITH A GLOBAL SOLUTIONS PROVIDER THAT MAKES ALL THE CONNECTIONS?

THE POWER OF &

What if you could work with a company that takes an integrated approach to both animal & food production, with both on-farm answers & postharvest solutions?

FULL-CIRCLE INSIGHTS

What if you could get comprehensive insights from a company that's expert at viewing your unique challenges from all possible angles?

TRUE PARTNERSHIP

What if you could count on having a partner who's ready, willing and eager to help solve both expected and unanticipated challenges?

WITH ARM & HAMMER™, YOU CAN.

WE OFFER:

- ✓ A single, unified team that can connect all the links of the food chain.
- ✓ An alternative to status quo solutions that is both nature-based and backed by proven research.
- ✓ A global solutions partner who helps the industry provide safe, affordable food in ways no one else can.

WHAT IS THE POWER OF &

For us, the & symbol is more than just a curiously shaped mark. It represents our passionately held belief in the power of addition, that there's always one more opportunity waiting to be unlocked by an integrated, global team focused on your unique needs.

ONE TEAM

The best solutions come from truly integrated teams with the talent, resources, ability and passion to offer just what you need. That means everyone on our team is asking the most important questions:

RESEARCH AND DEVELOPMENT

What's the next innovation for the industry's ever-changing challenges?

TECHNICAL SERVICE

How can those innovations make the greatest positive impact in real-world settings?

ACCOUNT TEAM

How can we serve our customers in a way that addresses all their needs?

ANALYTICS AND DATA

How can information lead to intelligence and game-changing insights?

LAB SUPPORT

In what ways can our state-of-the-art lab support all our efforts to serve customers?
